

PROJECTS

MINTO STORE (E-Commerce Web Application)

- Description:** Developed a fully responsive e-commerce frontend using Angular and TypeScript, featuring product listings, a dynamic cart system, and a checkout flow. Implemented Angular Signals for efficient, reactive state management and optimized UI performance. Integrated REST APIs for data handling with offline fallback mechanisms to ensure a seamless user experience.
- Technologies:** Angular, TypeScript, RxJS, Signals, SCSS
- Source code:** Major Minto Store ↗
- Live link:** Minto Store ↗

SECURITY BUNDLE BUILDER

- Description:** Developed a responsive multi-step e-commerce application for configuring home security systems with real-time pricing and bundle customization. Implemented an interactive accordion-style workflow and a real-time review panel to dynamically calculate cart totals, manage product variants, and display savings using React Context API for global state management.
- Technologies:** React, TypeScript, Tailwind CSS, Vite, Context API
- Source code:** Security Bundle Builder ↗
- Live link:** Security Bundle Builder ↗

PERSONAL PORTFOLIO

- Description:** Angular-based personal portfolio showcasing selected projects and UI structure.
- Technologies:** Angular, TypeScript, Signals, SCSS
- Source code:** Personal Portfolio ↗
- Live link:** Personal Portfolio ↗

Projects Experience

- Developed scalable, dynamic web applications utilizing Angular (Signals & RxJS) and React/Next.js to handle complex frontend architecture.
- Implemented modern Next.js Rendering Strategies (SSR, SSG) and Angular state management to optimize web performance, rendering speed, and SEO.
- Translated complex UI/UX design wireframes into responsive, clean, and reusable component ecosystems following modern industry best practices.
- Integrated RESTful APIs with advanced data-fetching logic, interceptors, and asynchronous state management to deliver smooth data synchronization.

TECHNICAL SKILLS

Frontend

- TypeScript & JavaScript:** Deep knowledge of Async programming, OOP, Closures, Prototypes, and ES6+ features.
- React.js:** Comprehensive understanding of Virtual DOM, Fiber Architecture, Reconciliation, and Custom Hook Design.
- Next.js Architecture:** Advanced Rendering Strategies (SSR, SSG, ISR), Server Components (RSC), App Router, and Performance Optimization.
- Angular Ecosystem:** Advanced Component Architecture, Signals (Reactive State), Router, Reactive Forms, and NgModules.
- RxJS:** Reactive programming with Observables, Observers.
- REST APIs & Networking:** Async data workflows using HttpClient (Angular), Axios (React), Interceptors, and Data synchronization.

UI & Styling

- Core UI:** HTML5, CSS3, SCSS, and Tailwind CSS.
- Responsive Design:** Mobile-First Layouts, Flexbox, Grid, and Cross-Browser Compatibility.
- UI Component Libraries:** Material-UI (MUI), Angular Material, PrimeNG, and Bootstrap.

Tools

- Tools & Version Control:** VS Code, Cursor, Git, GitHub, and Figma.

EDUCATION

El-Shorouk Academy

Bachelor's Degree in Information Systems (MIS)
2021- 2025

Route Academy

Frontend Web Development Course (Online, Certified)
2022
